SLIDE 1 · VISION

Kitchen table tonight

SAY: I'm Eric. UnStuck — no kid stays stuck at the kitchen table tonight. Right practice in minutes. Diagnose, generate, grade, adapt. Grades 4-6.

NOTE: Open with the vision line, not the product name dump. Hand to live demo later.

SLIDE 2 · PROBLEM

Six in ten behind

SAY: Six in ten fourth graders are behind — four in ten proficient. Nationwide NAEP ~39%. Arizona same story. One worksheet for 28. Kitchen table: zero plan for the exact gap.

NOTE: Punch = 6/10. Receipts under it. Don't drown in stats.

SLIDE 3 · SHIPPED LOOP

Quiz → Generate → Grade → Adapt

SAY: One adaptive loop — not another worksheet generator. Outside-in: Quiz finds the miss. Generate writes the set. Grade shows what landed. Adapt changes on purpose — then back to Quiz.

NOTE: Point at each outside callout into its block. Close on Adapt → Quiz.

SLIDE 4 · WEDGE

What doesn't exist at 8pm

SAY: Tutors and Khan Academy exist. What's missing is a customized learning journey right now — from this miss to a fresh set tonight. Parents, teachers, and students use this tonight.

NOTE: Say Khan Academy. Don't claim personalization is new — claim same-night journey from this error.

SLIDE 5 · LIVE DEMO ★

Bigger-bottom · next set changes

SAY: Same skill. Wrong answer. Next set changes on purpose. Watch Compare Fractions: they treat bigger bottom as bigger fraction — $3/8$ vs $3/5$. We catch it, then the next set scaffolds.

NOTE: Phone is the star. Let judges see Adapt fire. This is Completeness.

SLIDE 6 · CLOSE

That's UnStuck

SAY: We personalize practice. We don't diagnose disabilities. Teachers stay in control. The right practice shows up in minutes — and kids actually move forward. That's UnStuck.

NOTE: Safety close. End here if short on time. Skip Future.

SLIDE 7 · OPTIONAL ONLY

If time leftover

SAY: Same adaptive engine — deepen math first, then other subjects, teacher clarity, homework snap.

NOTE: Future last. Never lead with roadmap. If near time, skip and stay on slide 6.

DEMO GOLD

- Skill: Compare Fractions
- Error: bigger-bottom ($3/8$ vs $3/5$)
- Show: miss → scaffolded next set

SAFETY LOCKS

- Personalize practice
- Don't diagnose disabilities
- Teachers stay in control

JUDGES MAP

- Completeness = live adapt demo
- Innovation = miss → set tonight
- Market fit = parent at 8pm
